

The arpeggiator is an algorithmic melody generator. Usually there is no randomization but several algorithms, which can be combined in order to create complex and interesting patterns. This version uses two P2B8s and add a scale note selection and two knobs for selecting the output pitch range. All four pots have two functions. You can switch between the two layers A and B with the button B1.7

CLK			
CLK		ENV	V/O

I1	optional external clock	O1	internal clock
I2		O2	
I3		O3	envelope
I4		O4	pitch (V/oct)
I5		O5	
I6		O6	
I7		O7	
I8		O8
